SUMMARY

Full-stack developer with a front-end focus and 3+ years shipping web products to production for real clients — e-commerce stores, an offline-first POS, management systems and high-performance websites. I work with **Next.js, React and TypeScript** on the front end and **Supabase/PostgreSQL, Prisma/MySQL, Node.js and PHP** on the back, from design to CI/CD deploys. I care about performance (Core Web Vitals), accessibility, technical SEO and testing. Currently pursuing a Bachelor's in Information Systems.
